Important to the Afflicted.

Advice Free of Charge to all.

THE man who cures the most diseases in the shortest time, at the least expense, is the greatest public benefactor.—Professor W. E. MATHEW, from Liverpool, has the honour to inform the Public that he has opened a new HOTANIC INSTITUTE in COVENTRY, where he cures and all diseases of the Eye cured provided the sight is not gone or the disease of the ear is not broken. Professor MATHEW has for many years past directed his attention to the following class of complaints:—Deafness, diseases of the liver, stomach complaint, disorders of the head and eyes, fistula and piles, coughs, asthma, consumption, nervous diseases, fits, dropsy, spitting of blood, palpitation of the heart, giddiness, female complaints, rheumatism, cancers, scrofula or king's evil, leprosy, scurvy, ulcers, tetter, and sores of every description, whitespasms, sick headache, and all other diseases of the head, bowels, and digestive organs, sore throats, gravel, inflammation and irritation of the bladder, lumbago, erysipelas, and paralytic affections. Numerous persons have been blind for years have been restored to sight, and many who have been deaf for years have been restored to hearing. Averse to compound flattery and empty boast time should not be lost in giving Mr MATHEW ONE TRIAL. He will most certainly convince the most prejudiced or sceptical of his skill, and free the unhappy sufferer from the above diseases. Professor MATHEW may be consulted at his Residence, Mr. FARR'S, 18, FLEET-STREET, COVENTRY, from 4 to 8 p.m. Saturday, from 11 a.m. to 8 p.m. All letters will receive due attention.

Persons suffering from deafness and the other intricate diseases of the ear, will find Professor MATHEW's treatment far superior to any other.—"A number of scientific gentlemen assembled yesterday at the house of Professor MATHEW to witness the results produced by a process recently discovered by the Professor, and used for the cure of deafness. Between twenty and thirty patients attended, many of whom, it was stated by their parents, had been born deaf and dumb. They were submitted to various tests, by which it was proved that their deafness had been cured by the application of Professor MATHEW's remedies; and what appears most singular is, that whether the disease depended on paralysis of the auditory nerve, disease of the tympanum, or closure of the eustachian passage, relief had been obtained, or complete cure, effected, without pain or internal medicine."—*Times.*

PROSPECTUS.

THIS Company is proposed to be formed for the purpose of purchasing and developing the Improved Sewing Machines manufactured under the Patents granted to Messrs. Salisbury and Starley.

The necessity of introducing into Coventry a variety of Manufactures some time ago, induced a few Practical Gentlemen to undertake the making of these Machines; but being well aware of the possible caution, they first submitted the Patents to the judgment of the highest authority in Patent Laws, and then to several eminent Civil Engineers. The highly satisfactory and favourable nature of their Reports induced the Promoters to fit up a Factory with a complete Ass rtment of Machinery and Tools, and of organized a Staff of Skilled Workmen.

Sewing Machines are now becoming a Trading and Household necessity, and it is needless to add that the Machines manufactured under these Patents are not only a perfect, but cheaper than all others yet in the market under the notice of the Public. THEY SUPERSEDE HAS, INDEED, BEEN FULLY RECOGNISED AS ONE OF THE ONLY TWO PRIZE MEDALS GIVEN TO THE 16 BRITISH EXHIBITORS, was awarded to the Machine s by the Jurors at the European Exhibition of 1862.

As a further proof how well founded is the opinion formed of these Machines the following extract from the *Practical Mechanics' Journal*, for October, 1862, may be read on:—

"The European Sewing Machines Company exhibits in the Processes Court (1698) some well-finished lock-stitch Machines which are well worthy of common attention." "A considerable number of machines are in daily work, and the general arrangement of the working parts of these Machines, and we have little doubt that when better known they will find a place among the standard Sewing Machines of the day. As yet they are in their infancy."

The superabundance of labour in Coventry has induced the Committee to postpone the formation of Manufactories, and the following are the first Agents for the Machines:—

Birmingham—Messrs. Bradbury and Co., 3, Bull-street.
Coventry—Messrs. Bradbury and Co., Hertford-street.
Leamington—Messrs. Bradbury and Co., Bath-street.
Leicester—Messrs. Bradbury and Co., Gallowtree-gate.
Manchester—Messrs. Bradbury and Co., 10, Cross-street.
Nottingham—Messrs. Bradbury and Co., Bridlesmith-gate.
Warwick—Messrs. Bradbury and Co., Jury-street.

Applications for Shares may be made to the Company's Bankers or Solicitor, or any Member of the Provisional Committee; to the Solicitor; or at the Works, King-Street, Coventry, where the Machines and Plans may be seen.

THE SPECTATOR.

INDEPENDENT LIBERAL NEWSPAPER.

IN political principle the SPECTATOR is Whig, but with a strong leaning to Radicalism. Religious Reform at home and the extension of orderly freedom abroad than the old Whigs were supposed to have. In the management, however, in 1828, it has subordinated all party interests to the welfare of the People.

In all public questions, and more especially an all topics of social importance, this Journal occupies the position of intermediation, and has repeatedly during this year been the first to make the way for moving questions of grave interest. In objects, however, it is not to such topics that it confines its attention. It is the aim of the SPECTATOR to maintain the principle of Christian liberty, and, while opposing any and every attempt to establish the great truths of Christianity, to do battle against all forms of intolerance and religious persecution.

Parliamentary proceedings are related with the accuracy of a public record, and the commercial enchantments of a bi tory.

The News of the current Week is compressed into an animated narrative, which he that runs may read, without loosing the life or impact of the events.

Original papers supply comments critical and explanatory on Literature, Political Appointments, Law Amendment, Commercial Affairs, Personal Incidents, and Theological Controversies.

Every important work is noticed as it appears, with a view to its critical merits, so as to let the reader know what the book is, what it tells, and what it is place among other books. Of inferior works only such notice is given. Notice is also taken of the general course of Literature, its progress, right tendencies, personal events, &c.

The price of the Paper has been reduced to Sixpence, and the Paper may now be received in Town by breakfast time, and in the Country by the first mail of Saturday.
